Smarter sublime internetworking hearts and minds rule virtually anonymously and quite autonomously and mainstream media is a target for its payloads.

Such a consideration, explored occasionally if not frequently, is surely quite wise to ponder and wonder at, in order to determine the notion and/or condition wrong and a false diagnosis.

Thank you for your concern, OS. Be assured that presently all is well ..... with the future, of course, always subject to clinical, non cynical review.

How many “emergency” “secret” meetings do the central planners around the world need to have before the citizens of the respective countries begin to fully understand and take notice that something is very, very wrong? This year alone there have been several off-calendar meetings with, at least, one more now added to the docket.

Fully understanding, or even just understanding little enough about how everything works so badly internetworking, is what established vulnerable and corrupted systems are terrified about nowadays. And quite rightly so whenever they conceive to proceed on a not dissimilar course of actions to save their souls from accountability and responsibility for so many woes and foes.

Rise and Fall is based upon captured Nazi documents, the available diaries of propaganda minister Joseph Goebbels, General Franz Halder, and of the Italian Foreign Minister Galeazzo Ciano, evidence and testimony from the Nuremberg trials, British Foreign Office reports, and the author's recollection of six years reporting on Nazi Germany for newspapers, the United Press International (UPI), and CBS Radio —terminated by Nazi Party censorship in 1940.

Hi, Gray and Alistair and fellow lurking El Regers,

Are we in agreement that currently is there no effective stellar Western leadership in the global field of virtual reality production for media presentation of future placements of remote anonymously betatested and securely supplied programming?

Or is that a supporting alien concept and practical APT meme to bugger up sub-prime human failings and failures which all tend and trend towards monopolisation of the mainstream?

Or is it easily and readily made available in Stealthy Quantum Communications AI Mode as both and in something else too, completely different and novel?

And would those questions be asked if the possibilities were not true, with facilities already provided and creating cosmic wave movements in CyberIntelAlgent Security and Virtual Protection Fields of Effortless Endeavour with Sublime Corrections ..... for a sort of real virtual world tectonic plates shifting in the human condition/virtual machine situation?

And whenever you know that your systems leaderships know full well the state of that kind of globalised play, what does that tell of their fitness of purpose to be lead in other than a criminal enterprise at odds to the greater public good. By their inactions are they branded complicit and accessories to surely at least a treasonous skulduggery before, during and after the fact ?

And, upon further consideration and reflection on the above, are pirates at play in their midsts cooking books in stock fantasy markets, most probably an ever greater threat that cannot be defeated by status quo forces and established systems of command and control.

#### Penultimate Ultimate Weapons Systems ..... Suffer Not the Folly of Fools with Blunted Tools

**“We want GCHQ to be more accessible and to help the public understand more about our work,” it said.**

To rule almost anonymously and practically autonomously and reign over everything remotely from fields afar via virtualised memes with media manipulation booting and rebooting a pathetic and apathetic trailing reaction in preference to any effective competition and/or crushing opposition with leading AI proaction, is easy enough to understand, but a mined mind field of explosive disasters to negotiate and claim as ones own with a master plan providing the future way forward out of the present without all of its past failures identifying the wannabe Caesar and Hitler types with systems responsible for current madnesses and mayhem and the realities created for projection/production/placement, tells you more about our work than you may be able to accept is possible.

Your doubts with any shreds of lingering disbelief is that which grants access to hidden dark secrets and allows guaranteed unhindered passage to pastures both green and ancient, alien and better beta tested for that and/or those into the finest of arts and Greater IntelAlgent Games Play. ?

Is GCHQ leading and into IT in such a way? Or is that which they are face to face with and terrorising?

And what price, other than priceless and whatever be asked of IT principals to be delivered, could the markets decide for whenever such is a stunningly successful private pirate venture and perfectly secure covert business model rather than public facing, clandestinely funded nationalised intelligence agency?

In any system, where money in any and all of its forms rules and reigns, is there always an absolutely fabulous price to be paid to ensure that smarter lead remains and is maintained and retrained in safer secure hands, hearts and minds. And such is always whenever truly for real, one of those internetworking bargains of the century things.
